RDBMS	MySQL,Mongodb
Scripting	JavaScript

Work Experience

Full Stack Developer   [1 Months]
[SpecialChar Pvt.Ltd]

Projects

Project Title : **E-commerce Website Template using react-js**

Environment : HTML5, bootstrap , JavaScript , Reactjs , Nodejs, MongoDB

Description : I have developed a responsive and user-friendly ecommerce website template using HTML5, Bootstrap, JavaScript, React.js, Node.js, and MongoDB. The template features a modern and sleek design. The template is suitable for any online store that wants to showcase and sell their products or services. I used HTML5 and Bootstrap to create the layout and style of the website, JavaScript and React.js to handle the front-end logic and interactivity, Node.js and MongoDB to manage the back-end server and database.You can view the live demo of the template here.
